PART 7 COMMUNITY OUTREACH ACTIVITIES

Part 7 provides a table listing the Project's Community Outreach Activities. The 161 activities listed are in addition to the Project's consultation meetings where Project information and updates were provided to stakeholders, interest groups, organizations, or broader public audiences by BC Hydro. The activities are categorized as follows:

- **Project Update** is defined as presentations or meetings to deliver Project information to a variety of audiences
- **Project Information** is defined as sharing Project information as part of a larger event, such as participation in a community trade show

Although this table includes Project Updates given to local governments by way of presentations to councils or regional district boards, a complete list of meetings with local governments held as part of the ongoing Regional and Local Government Liaison Program is available in Volume 1 Appendix G, Part 2 Regional and Local Government Liaison Summary, and on the Project website.

A list of presenters and their affiliations is provided at the end of this table.
