Ms. Lise Morton
Vice President, Nuclear Waste Management
Ontario Power Generation
1340 Pickering Parkway, P84, Fourth Floor
Pickering, ON L1V 0C4

Dear Ms. Morton:

SUBJECT: Deep Geologic Repository for Low and Intermediate Level Radioactive Waste Project – Final Results of the Technical Review of Ontario Power Generation's Response to the Ministerial Request for Additional Information

On December 28, 2016, the Canadian Environmental Assessment Agency (the Agency) received Ontario Power Generation's (OPG) response to the request by the Minister of Environment and Climate Change for additional information relating to the Deep Geologic Repository for Low and Intermediate Level Radioactive Waste Project (the Project).

On April 5, 2017, after taking into consideration comments received from the public, Indigenous groups, and federal authorities, the Agency issued a request to OPG for additional information to supplement your response of December 28, 2017. OPG provided its response to this request on May 26, 2017.

The Agency has completed its review of the information provided by OPG since December 28, 2016. The Agency reviewed this information in light of the requirements outlined in the Minister's letter of February 18, 2016, the Agency's letter of September 7, 2016, as well as the Agency's letter of April 5, 2017 requesting additional information. The Agency has determined that the environmental assessment process for the Project can proceed to the next step.

At this time, I encourage you to keep up to date regarding the comments received from the public, Indigenous groups, and federal expert departments, which will be posted on the Canadian Environmental Assessment Registry on an ongoing basis.

Please contact me if you require further information. I can be reached at <contact information removed> or
