

8.2 Summary of Assessment of Potential Heritage Effects

Potential heritage effects of the Proposed Project and associated key mitigation measures are presented in Table 8.2-1. A summary of predicted residual heritage effects and residual cumulative heritage effects are presented in Table 8.2-2.

Table 8.2-1: Summary of Potential Heritage Effects and Associated Key Mitigation Measures

Valued Component	Phase	Potential Effect	Key Mitigation Measures	
			No.	Description
Heritage Resources				
Heritage Resources	Construction Operations Reclamation and Closure	Changes to heritage resource integrity, context and accessibility, if present	M-8.1-01	Implement Heritage Resource Chance Find Management Plan (Part E, Section 16.0) that provides management recommendations for avoidance, systematic data recovery or monitoring, in the event that undetected heritage resources are encountered during project activities.

Table 8.2-2: Summary of Assessment of Potential Residual and Cumulative Residual Heritage Effects

Valued Component	Phase	Residual Effect Assessment		Cumulative Residual Effect Assessment	
		Potential Effect	Significance	Potential Effect	Significance
Heritage Resources					
Heritage Resources	Construction	Changes to heritage resource integrity, context and accessibility, if present.	Not significant	Changes to heritage resource integrity, context and accessibility, if present.	Negligible
Heritage Resources	Operations	Changes to heritage resource integrity, context and accessibility, if present.	Not significant	Changes to heritage resource integrity, context and accessibility, if present.	Not Significant
Heritage Resources	Reclamation and Closure	Changes to heritage resource integrity, context and accessibility, if present.	Not significant	Changes to heritage resource integrity, context and accessibility, if present.	Negligible
