Subject: Re: Marathon Palladium Project / Projet de Palladium de Marathon

Hello Panel,

This is in response to the delay of closing remarks. I don't see how the delay in submission of undertaking 31 can have any effects on the closing arguments. I believe if we defer the closing arguments will impact the hearing negatively as participants will get busy with their personal and work life. Furthermore as time passes the info that all presenters worked hard to share since March 14 might become stale in participants minds.

I don't know who requested the deferral but in order for me to make an educated decision I think we need reasoning behind this request and how in their opinion it will positively affect the outcome. (Whichever way it is)

So with the information that I respectfully have to strongly urge the panel to resume closing statements as originally scheduled.

P.s I had responded to BN and proponent request in a separate email as I didn't see how I can mix both answers without jeopardizing my responses.

Thank you
Sam Bawab
