

Proposed Robb Trend Coal Mine Expansion Project

- Modern surface mining was introduced into the Coal Branch Area during the 1960s.
- Coal Valley Mine (CVM) has been in operation since 1978 employing both truck/shovel and dragline mining methods
- The CVM produces "High Volatile Bituminous" thermal coal for sale to international markets
- To date the CVM has supplied 60 million tonnes of coal to international markets
- Approximately +300 people are employed at the CVM and associated processing plant
