Identifier	Topic	Reference to EIS/EA Report	Summary of Previous Comment	Proponent's Response to Previous Comment	Follow-up comment/ Request for Information	New Proponent Response	Subsequent Comment
			<i>Date: March 2014</i> EAB Wastewater-8	<i>Date: June 2015</i>	<i>Date: August 2015</i>		
EAB Wastewater 8B	Water quality, Effluent discharge, Effluent Treatment plan	N/A	With respect to design information provided in the EA, it is specified that an Effluent Treatment Plant for treatment of excess water will be provided as a contingency measure. This would obviously have to be evaluated very carefully as effluent discharge criteria are established.	Canadian Malartic will comply with the effluent discharge criteria established for the Project. If treatment is required to achieve compliance, design details of the treatment facility will be provided as part of permitting for the treatment facility	The response is sufficient.	Acknowledged.	N/A
