MNDM 8	Socio- economic environment	OHRG response to MNDM 28 in appendix 1.IV	Town of Atikokan would benefit more from transporting workers to mine site rather than on-site camp.	Thank you for your comment. Although Canadian Malartic will construct an on-site camp, workers will still be encouraged to consider living in Town. Canadian Malartic is committed to providing incentives for workers to live in Town, the details of which will be further informed through consultation with the local committee.	MNDM 8B
