MOE SW-15	Water Balance and Water Takings	EIS/EA §6.1.3.1.3	Section 6.1.3.1.3 reports expected changes to water levels in Marmion Reservoir due to project activities during the Operations phase. It should be noted that details of water balance predictions will be further reviewed and determined at permitting and approvals and so the information provided in the EIS/EA Report could change with respect to these values and their application.	It is acknowledged that the water balance modelling will be further reviewed during the permitting phase of the Project.	<a href="#">MOE SW-15B</a>
