newg		ENV-SOP-0002 Environmental Department Spill Reporting Procedure		
Owner: Senior Environmental	Approver: Manager Environment	Status: Approved	Date Created: July 11, 2015	
Specialist		Review Frequency: 1 Year	Effective Date: February 1 st , 2018	

1. Purpose

The purpose of the following document is to clarify spill reporting responsibilities of the Environmental Department for the Rainy River Mine including spill tracking and external required reporting. This document is designed to be consistent with Federal and Provincial Reporting Regulations, Corporate Standards for spill reporting (EMS Standard 008.01) and aligned with additional agreements New Gold has entered into. Spill response requirements and responsibilities for those working on the Rainy River Mine can be found in ENV-SOP-0001.

2. Scope

This procedure is an outline of the spill reporting responsibilities for the Environmental Department.

3. Definitions

Spill	A spill is defined as a "spill", when used with reference to a pollutant, and means a discharge: (a) into or onto the natural environment, (b) from or out of a structure, vehicle or other container, and (c) that is abnormal in quality or quantity in light of all the circumstances of the discharge. Spills requiring reporting under this requirement do not include approved discharges such as discharges to air, water and land approved under the Environmental Protection Act (EPA) or other regulatory approval provided the discharge is compliant with the approval. Spill volume is the amount of material that contacted the environment (ground, water or air).
Project Site	 The Project Site is defined as; All project components plus approximately 100 m zone; Highway 600 from Hwy 71 to Seven Bends; Teeple Road from Hwy 71 to Hwy 600; Municipal roads used for access including but not limited to Teeple Road, Roen Road, Korpi Road and Eluik Road; or As designated by the Construction Director as the Project progresses.

4. Responsibilities and Accountabilities

Rainy River Manager Environment

- Approves this policy and ensures its communication to site personnel
- Oversees the Environmental Department to ensure compliance with this procedure
- Is responsible to ensure reportable spills are communicated appropriately to regulatory bodies in line with approvals and reporting requirements

Environmental Department

- Provide support to Rainy River personnel and contractors in regards to spill response and reporting, including sampling where necessary
- Maintains an on call schedule to ensure support is provided to mine personnel 24 hours a day
- Contacts the Spill Action Centre as a first contact after a reportable spill
- Compiles incident details and composes follow up letters detailing incidents to regulators
- Maintain a registry of all spills
- Distribute spill information to authorized internal and external stakeholders

Department and Area Managers

- Support the procedure and ensure departmental staff follow its expectations
- Ensure departmental Supervisors are trained to lead the spill response within their crews and are familure with the external reporting thresholds
- Support any follow up investigations as required

Supervisors (of the crew reporting the spill)

- Ensure that the spill incident procedure is managed effectively and limits impact to the environment as much as possible
- Report all spills consistent with ENV-SOP-0001 and determine if spills are externally reportable
- Lead any follow up investigations

Employees and Contractors

 Report all spills and respond appropriately, consistent with spill response requirements as detailed further in ENV-SOP-0001

5. Guidelines & Instructions

Spills that pose an immediate threat to human life/health and sustained and ongoing threat to the environment (e.g., bulk fuels, sediment dam breach, truck roll over):

- Initiate Emergency Response Plan through site radios and indicate Environmental emergency
 - The Environment On-Call (Environment Manager or designate) will be contacted immediately.

5.1 Spill Response

- The Environmental Department will be called as soon as possible following an Externally Reportable Spill as outlined in ENV-SOP-0001
 - via radio Channel 4 or phone 1-807-632-6152
- The main function of the Environmental Department during the initial spill responde is to provide immediate assistance to site personnel in relation to the containment of the spill and remedial actions necessary

5.2 Regulatory Reporting

Externally reportable spills exceeding mandatory reporting thresholds of O. Reg 675/98 (Table 1) and spills on third party property within the project site (e.g., municipal roads, Hwy 600, Table 2):

- Environmental Manager or designate to follow "Environmental Reportable Incident Call List" Appendix 3.
- The Manager or designate will contact the Spills Action Center at 1-800-268-6060 and report:
 - \circ your name and phone number
 - o name and phone number of the person or company in control of the product spilled
 - o date, time and location of the spill
 - o duration of the spill (if known) and whether the spill is ongoing
 - type and quantity of pollutant spilled, including hazard level or toxicity information
 - o source of the spill and information on the cause
 - o description of adverse effects
 - environmental conditions that affect the spill (weather, traffic, etc.)
 - actions being taken to respond
 - other agencies and parties responding
- A follow-up report detailing the incident must be submitted via a transmittal to regulatory bodies within the time frames detailed below. The report must include:
 - \circ The measures that were taken to mitigate the effects of the occurrence;
 - If an emergency response plan was implemented, details concerning its implementation; and
 - Changes made to avoid a subsequent occurrence of the accident or malfunction.
 - MOECC within 7 days of incident.
 - MNRF within 7 days of incident, if TSS or Fisheries related.
 - DFO within 30 days of incident.
 - ECCC within 30 days of incident, Adam Scheepers and Dan McDonell.
 - CEAA within 30 days of incident.
- New Gold Environmental Department will update the spill incident in InControl consistent with O.Reg 675/98 when Spill Report Form is received.
 - Classify incidents according to the NG Risk Consequence categories (Level 1, 2 or 3) as per 008.04 Incident Assessment and Response Matrix

5.3 Follow up Investigation

- Following the initial incident and once clean up has been completed, an initial investigation of the incident should take place. This will be lead by the Supervisor responsible for the area in which the spill occurred with the support of The Environmental Department.
 - The investigation should include all information required for the follow up report as detailed above and focus on implementing measures to reduce the chance of reoccurance
- Root cause analysis is required for all significant incidents. Spills which require this as per 002.06_CORPORATE ESR INCIDENT REPORTING GUIDELINES are:
 - Cyanide spills outside of normal processing area.
 - Hydrocarbon spills that trigger requirement to report to regulatory authorities.
 - Other spills that trigger requirement to report to regulatory authorities.

Table 1: Reportable Levels for Different Substances (off municipal/provincial roads) (O.Reg 675/98)			
Substance Spilled	Reporting Threshold		
Refrigerants (as listed in O Reg 189/94)	100 Kg		
Hydrocarbons			
Gasoline Petroleum products	100 L, any if into water		
Electrical utilities (excluding PCB's) Oil from Transformers 	100 L, any if into water		
Dangerous goods (as listed in TDG act)	See TDG Act Schedule 1 for complete list		
Class 1, Explosives	10 kg, any quantity that poses a public risk		
Class 2, Gases SO2	Any release of 10 + minutes, any quantity that poses a public risk		
Class 3, Flammable Liquids	200 L, any if into water		
Class 4, Flammable Solids/Water-Reactive Substances	25 kg, any if into water		
Class 5.1, Oxidizing Substances O2	50 kg/ 50 L		
Class 5.2, Organic Peroxides	1 kg/ 1		
Class 6, Toxic Substances Cyanide, Copper Sulfate, Sodium Metabisulfite 	5 kg/ 5 L		
Class 6.2, Infectious Substances N/A 	Any quantity		
Class 7, Radioactive Materials Nuclear Devices 	Any quantity that poses a public risk		
Class 8, Corrosives • Hydrochloric Acid, Sodium Hydroxide, Lime	5 kg/ 5 L		
Class 9, Miscellaneous Products, Substances or Organisms	25 kg/ 25 L		
Tailings	Any Amount is reportable		
Emulsion	Any Amount is reportable		

Tab	Table 2: Exemptions for spill reporting on Highways			
ID	Description			
(a)	(a) Less than 100 L of fluid other than other than fluid transported as cargo, from the fuel system or other operating system of a motor vehicle.			
(b)	b) the spill does not enter and is not likely to enter any waters, as defined in the Ontario Water Resources Act, directly or through drainage structures			
(c)) the spill does not cause and is not likely to cause any adverse effects, other than those that are readily remediated through cleanup and restoration of surfaces that are prepared for vehicular traffic or paved, graveled, sodded areas adjacent to those surfaces			
(d)	d) Arrangements for the remediation referred to in clause (c) are made and carried out immediately.			

6. Documentation

The Spill Report Form is to be completed by Supervisor or Designate of the area in which the spill occurs.

For New Gold Departments only, the incident details are to be entered into InControl software by the supervisor or designate as soon as possible and before shift end.

The Environment Department will update INControl consistent with O. Reg 675/98.

A follow up report is to be sent to the following agencies within the time frames specified below: Ministry of the Environment and Climate Change (MOECC) - Within 7 Days

Ministry of Natural Resources and Forestry (MNRF) – Within 7 Days

EnvironmentCanada (EC) – Within 30 Days

Department of Fisheries and Oceans (DFO) – Within 30 Days

Canadian Environmental Assessment Agency (CEAA) - Within 30 Days

Every quarter the Environmental Department will review all spills on site and conduct Spill Audits on 10% of reported spills as per ENV-SOP-0006

Root Cause Analysis completed on all externally reportable spills as per EMStd-008.1 Incident and Crisis Management.
