

**PACIFIC NORTHWEST LNG - ADDENDUM TO THE
ENVIRONMENTAL IMPACT STATEMENT**

Economic Environment
December 12, 2014

14.0 ECONOMIC ENVIRONMENT

The assessment of the potential economic effects that may result from project construction, operations and decommissioning was provided in Section 14 of the EIS. The contents of Section 14 remain valid and there has not been a material change to the assessment of residual or cumulative economic effects resulting from the project changes. Consequently, no update to Section 14 – Economic Environment is provided in this EIS Addendum. This EIS Addendum has been prepared in response to a request from the CEA Agency to update specific chapters in areas of federal interest. An update to this chapter was not required.
