

BRUCEJACK GOLD MINE PROJECT
Application for an Environmental Assessment Certificate /
Environmental Impact Statement

Appendix 5-1

Brucejack Project Ground Control Management Plan - Outline

Brucejack Project

Ground Control Management Plan - Outline

With Content From:

Pretivm Resources Inc. - Brucejack Project Owner
Procon Mining and Tunneling Inc. - Mining Contractor
BGC Engineering Inc. - Mining Geotechnical Consultant

Effective: July 2014

Expires: July 2015

Table of Contents

0	Introduction	1
1	Ground Control Roles and Responsibilities	3
2	Ground Control Management for Mine Design and Planning	5
2.1	Geology and Geotechnical Database	6
2.1.1	Drill Holes.....	6
2.1.2	Geotechnical Core Logging	6
2.1.3	Televiewer Surveys and Oriented Core	7
2.1.4	Structural Mapping	7
2.1.5	Geotechnical Inspections.....	7
2.2	Geology and Geotechnical Models	8
2.2.1	Geological Setting	8
2.2.2	Major Faults and Regional Structure	9
2.2.3	In-situ Stress	10
2.2.4	Rock Mass Characterization and Geotechnical Units	12
2.2.5	Brucejack Fault.....	15
2.2.6	Hydrogeology.....	16
2.3	Brucejack Mine Plan	17
2.3.1	Access and Ramp Infrastructure	18
2.3.2	Level Development	20
2.3.3	Excavation Dimensions	22
2.3.4	Stope Cycle	24
2.3.5	Stope Sequence	26
2.3.6	Backfilling.....	27
2.4	Underground Rock Mechanics Assessment	28
2.4.1	Methodology	28
2.4.2	Primary and Secondary Stope Designs	28
2.4.3	Stope Ground Support	30
2.4.4	3D Stress Analysis	30
2.4.5	Stand-off Distances.....	30
2.4.6	Rib Pillars	30
2.4.7	Sill Pillars	31
2.4.8	Crown Pillar.....	31
2.4.9	Ground Support	31

2.4.10	Full-width Undercuts	33
2.4.11	Mining through the Brucejack Fault	33
2.4.12	Surface Raise Locations	34
2.4.13	Underground Crusher and Other Mine Infrastructure	34
3	Implementing the Ground Control Management Plan	37
3.1	Ground Control Training	37
3.2	Ground Control Communication	37
3.2.1	Meetings	37
3.2.2	Ground Control Information Sessions	38
3.2.3	Job Hazard Assessments	38
3.2.4	Ground Control Notice board	39
3.2.5	'Issued For Construction' Mine Plans	39
3.2.6	Variation of Ground Support	39
3.2.7	Rehabilitation Memorandums	39
3.2.8	Reporting Ground Control Hazards	40
3.3	Safe Work Procedures	40
3.4	Observing and Assessing Ground Behaviour	41
3.4.1	Rock Mass Quality	41
3.4.2	Investigating rock or support failures	42
3.4.3	Convergence Monitoring	42
3.4.4	Overbreak and Blast Damage	43
3.5	Records Management	43
3.5.1	Geotechnical Hazards	43
3.5.2	Geotechnical Log Book	43
3.5.3	Mapping Data	43
3.5.4	Photographic Records	44
3.5.5	Underground Geotechnical Monitoring Data	44
4	Verification of the Ground Control Management Plan	45
4.1	Excavation Performance Assessments	45
4.1.1	Active Headings and Stope Inspections	45
4.1.2	Main Travelways and Escapeways	45
4.1.3	All other Excavations	45
4.2	Monitoring Quality Assurance and Quality Control of Ground Support	45
4.2.2	Shotcrete QA / QC	47
4.2.3	Grouting and Grout Testing	48

4.3	Reviewing and Updating the Ground Control Management Plan.....	48
4.3.1	Annual Audit	48
4.3.2	Summary of Changes	48
4.3.3	Document Endorsement.....	49
5	References	50
