(1) EMPC / NDR - Peak detected does not meet ratio criteria and has resulted in an elevated detection limit.

(2) Some of the Internal standard Recoveries are outside method criteria, due to possible matrix interferences caused suppression on recovery standard PCB194L. No affect to native concentration.

(3) Recovery or RPD for this parameter is outside control limits. The overall quality control for this analysis meets acceptability criteria.

(1) EMPC / NDR - Peak detected does not meet ratio criteria and has resulted in an elevated detection limit.

(2) Internal standard recovery is outside method limits, possibly due to matrix effects.

(3) Recovery or RPD for this parameter is outside control limits. The overall quality control for this analysis meets acceptability criteria.

(4) Some of the Internal standard Recoveries are outside method criteria, due to possible matrix interferences caused suppression on recovery standard PCB194L. No affect to native concentration.

(1) EMPC / NDR - Peak detected does not meet ratio criteria and has resulted in an elevated detection limit.

(2) Some of the Internal standard Recoveries are outside method criteria, due to possible matrix interferences caused suppression on recovery standard PCB194L. No affect to native concentration.

(3) Recovery or RPD for this parameter is outside control limits. The overall quality control for this analysis meets acceptability criteria.
