Canada's Nuclear
Regulator

Canada's nuclear regulator invites you to open houses in Deep River (Ontario) and Rapides-des-Joachims (Quebec)

The Canadian Nuclear Safety Commission (CNSC) will hold open houses to provide information about the environmental assessment and licensing process currently underway for Canadian Nuclear Laboratories' proposed Nuclear Power Demonstration (NPD) Closure Project.

The open houses are being held during the public comment period on the draft environmental impact statement (EIS) for the proposed project. The objectives of the sessions are to inform the public of the environmental assessment and licensing process for the proposed project, to provide information on the proposed project, and to clarify how the public can participate in the process, including providing comments on the draft EIS. CNSC staff will be available to discuss the content of the draft EIS and answer questions from the public.

Deep River, Ontario – Open house

When: December 4, 2017, 5 p.m. to 8 p.m.

Where: Deep River Legion, 50 McElligott Drive,
Deep River, Ontario

Rapides-des-Joachims, Quebec – Open house

When: December 5, 2017, 6:30 p.m. to 8:30 p.m.

Where: Rapides-des-Joachims (Swisha) Town Hall,
48 de l'Église, Rapides-des-Joachims, Quebec

About the sessions

Our staff will be on hand to provide information and answer questions about:

- how we regulate the nuclear sector
- the environmental assessment for the proposed NPD Closure Project
- the licensing process for the requested licence amendment to authorize the proposed NPD Closure Project
- public participation in our upcoming public Commission proceedings related to the proposed NPD Closure Project
- how we conduct safety checks, inspections, and sampling to ensure that communities and the environment remain safe

About us

We regulate the use of nuclear energy and materials to protect health, safety, security and the environment; to implement Canada's international commitments on the peaceful use of nuclear energy; and to disseminate objective scientific, technical and regulatory information to the public. Our mandate is to ensure safety.
