SUBJECT: James Bay Lithium Mine Project – Responses to the June 27, 2019 Information Request

Dear Mrs. Amyot:

On 18 February 2020, the Joint Assessment Committee (the Committee) received a second set of additional responses to its June 27, 2019 information request, regarding the environmental assessment of the aforementioned project. The responses are included in the following document:

WSP, 2020. *James Bay Lithium Mine Project. Responses to the January 8, 2020 request for additional information received from the Impact Assessment Agency of Canada in connection with the environmental assessment of the project.* Report produced for Galaxy Lithium (Canada) Inc. 35 pages and appendices.

The Committee compared the request for information and the responses provided. This cross-referencing determined that the responses are consistent with the information requested, with the exception of the results of the kinetic tests on the ore and the analysis of the potential effects of the ore on water quality, which will be submitted to the Committee as soon as possible. However, the Committee has decided to continue the technical analysis of the corroborating information received to date.

In order to obtain clarification of the information received, questions may be forwarded later through an information request that will allow the Committee to complete its analysis of the environmental effects of the project. This information request could be divided into two parts. The first part could address the issues raised in the first information request and during the October 2019 and December 2019 Indigenous consultations. The second part, where appropriate, would address elements of responses related to the results of the kinetic testing on the ore and the potential effects on water quality.

 $\dots/2$

This second part would be forwarded to you only after the Committee has received the results of these tests.

If you need further information, please contact Véronique Lalande by phone at 418-455-4116 or by email at veronique.lalande@canada.ca.

Yours truly,

Benoît Dubreuil
