Subject: Outcome of CNSC Staff Completeness Check of the May 22, 2024 Responses to Federal Indigenous Review Team Information Requests for the Rook I Project

Dear Mr. Moger,

On May 22, 2024, NexGen Energy Ltd. (NexGen) submitted a draft Environmental Impact Statement (EIS) package, including responses to Information Requests (IRs), Advice to the Proponent comments, a revised EIS - including Technical Support Documents and Baseline Reports, as well as a Commitments Table for the proposed Rook I Project [1]. CNSC staff have determined that the submission has the required information for the Federal-Indigenous Review Team (FIRT) to proceed with the EIS technical review.

The technical review of the complete package of information, including technical supporting documentation, will commence on June 21, 2024, taking up to 90 days to complete and ending no later than September 20, 2024. Should NexGen and CNSC determine that technical meetings are required following FIRT review, to work through unresolved IRs, the EIS technical review may be extended beyond the 90-day time frame.

Should you have any questions, please do not hesitate to contact me, directly by phone at 343-542-7657 or by email at Nicole.Frigault@cnsccsn.gc.ca.

Sincerely,

Nicole Frigault
Environmental Review Specialist
Environmental Review Division
