		<p>Naturally Occurring Conditions</p> <ul style="list-style-type: none"> • Sea ice interaction • Seismic activity • Geohazards • Weather and extreme weather (climate change effects) • Substrate destabilization, scour and transportation 	

Note: Impact Producing Factors associated with the following valued components have been addressed under separate Advice Requests and ongoing engagement:

- Fish and fish habitat (including commercial fisheries, marine mammals and sea turtles); and,
- First Nations
