

Dear Victoria Stinson:

On December 12, 2022, the Impact Assessment Agency of Canada (the Agency) received a Detailed Project Description and Response to Summary of Issues from Canada Nickel Company (the Proponent) for the Crawford Nickel Project (the Project). The Agency will review these documents and decide within approximately 10 days whether these items sufficiently meet the information prescribed by the Information and Management of Time Limits Regulations, or whether the Proponent must revise and re-submit these documents.

Next Steps:

On October 17, 2022, the Proponent requested a time limit suspension for the Planning Phase. If the Detailed Project Description and Response to the Summary of Issues meet the information requirements, then the 180-day time limit for the planning phase would resume as of December 12, 2022, the date that the documents were submitted. The Agency will post a notice that the 180-day time limit has resumed and share these documents on the Canadian Impact Assessment Registry (Project 83857). Then the Agency will proceed with determining whether a federal impact assessment is required for the Project, pursuant to the Impact Assessment Act.

We are looking forward to meeting with the Métis Nation of Ontario on January 12, 2023 to discuss the draft Tailored Impact Statement Guidelines (TISG) and the draft Indigenous Engagement and Partnership Plan (IEPP) for the Crawford Nickel Project.

The Agency will continue to contact you about the outcome and next steps in the impact assessment process. If you have any questions, do not hesitate to contact me by email at Crawford@iaac-aeic.gc.ca or by phone at 902-399-8838.

Thank you,

Erin Norton
