

Enclosure 1: Summary of information on potential impacts of the Crawford Nickel Project on Apitipi Anicinapek Nation

This **draft** document was prepared by the Impact Assessment Agency of Canada (the Agency) during the Planning Phase for the Crawford Nickel Project (the Project). The purpose of this document is to set out the Agency's preliminary understanding of the **potential** impacts of the Project on Apitipi Anicinapek Nation. The Tailored Impact Statement Guidelines for the Project will identify all of the valued components the Proponent will be required to study during the preparation of its Impact Statement. As additional information about impacts of the Project that are specific to Apitipi Anicinapek Nation becomes available throughout the impact assessment process, this document will be updated, and will inform the Proponent's studies and the impact assessment.

The Proposed Project

Canada Nickel Company (the Proponent) is proposing an open-pit nickel-cobalt mine and metal mill, located 43 kilometres north of Timmins, Ontario. Based on available information, the "project area" includes:

- *a large mine site footprint of > 5000 ha, including open pits, waste rock piles and a tailings management facility, predominantly within the North Driftwood River and West Buskegau River watersheds;*
- *relocation of Highway 655 and existing 500 kV transmission line to the west of the mine, including approximately 20 km of new right of way;*
- *effluent discharge pipe(s) to locations that may include the Mattagami River downstream of Lower Sturgeon Dam, the North Driftwood River, and the West Buskegau River;*
- *a new rail spur from the proposed mine south to Kidd Mine, following Highway 655; and*
- *transport of ore along an existing rail line between Kidd Mine and Kidd metallurgical site.*
