Weina Chong:

**Subject: Start of the Public Comment Period on the draft Integrated Tailored Impact Statement Guidelines and Public Participation Plan for the Bruce C Nuclear Project**

On December 20, 2024, the Impact Assessment Agency of Canada (IAAC) posted a Notice of Impact Assessment Decision with Reasons stating that an impact assessment is required for the Bruce C Nuclear Project (the Project) proposed by Bruce Power. On the same day, IAAC posted a Notice of Referral to Review Panel stating the assessment is referred to a review panel. As the Project includes activities regulated under the *Nuclear Safety and Control Act*, IAAC will be conducting an integrated assessment in collaboration with the Canadian Nuclear Safety Commission (CNSC).

IAAC, in collaboration with the CNSC, developed the draft Integrated Tailored Impact Statement Guidelines (draft Integrated Guidelines) and other Planning phase documents for the integrated assessment of the Project. These draft documents have been posted on the Canadian Impact Assessment Registry<sup>1</sup> (the Registry).

Today, June 12, 2025, IAAC initiated a 29-day public comment period to seek input on the draft Integrated Guidelines and the draft Public Participation Plan. The Public Notice for this comment period can also be found on the Registry.

IAAC and the CNSC invite you to submit comments and to share the notice with Indigenous Nations and communities and members of the public who may be subscribed to updates related to the Project via your communications.

After the comment period ends on July 11, 2025, IAAC and the CNSC will finalize

<sup>1</sup> <https://iaac-aeic.gc.ca/050/evaluations/proj/88771>

the draft Integrated Guidelines and other Planning phase documents for the integrated assessment of the Project. IAAC will also prepare a Notice of Commencement to be posted within the 180-day Planning phase time limit.

Should you have any questions, please do not hesitate to contact me at [bruce@iaac-aeic.gc.ca](mailto:bruce@iaac-aeic.gc.ca).

Sincerely,
