Glossary

Term	Definition
------	------------

Canadian Impact Assessment Registry (registry)	The Canadian Impact Assessment Registry is an online platform established and maintained by the Impact Assessment Agency of Canada and will be the official record of the integrated assessment process for the project.
Canadian Nuclear Safety Commission (CNSC)	As a lifecycle regulator, the CNSC regulates the use of nuclear energy and materials to protect health, safety, security and the environment in accordance with the <i>Nuclear Safety and Control Act</i> . The CNSC also implements Canada's international commitments on the peaceful use of nuclear energy, and disseminates objective scientific, technical and regulatory information to the public.
Governor in Council	The Governor General of Canada acting by and with the advice of the King's Privy Council for Canada.
Hearing Procedures	Review panel document that provides an overview of how the public hearings will be conducted and explains how the public can participate in the hearings.
<i>Impact Assessment Act</i> (IAA)	The Impact Assessment Act and its regulations form the legal framework for federal impact assessments.
Impact Assessment Agency of Canada (IAAC)	IAAC is a federal body accountable to the Minister of Environment and Climate Change. IAAC provides high-quality impact assessments that contribute to informed decision-making, in support of sustainable development. IAAC is the responsible authority for all federal impact assessments.
Impact Statement	Detailed technical document prepared by the proponent as per the requirements set out in the Integrated Tailored Impact Statement Guidelines which would include the CNSC's requirements for the Licence to Prepare Site.
Integrated Impact Assessment (integrated assessment)	Review of the proposed project, led by a review panel that will meet the federal requirements for an integrated assessment under <i>the Impact Assessment Act</i> and the <i>Nuclear Safety and Control Act</i> .
Integrated Review Panel (review panel)	An Integrated Review Panel is a group of independent experts appointed by the president of IAAC to conduct an integrated assessment. At least one review panel member is appointed from the CNSC's roster. The members are selected based on their knowledge or experience relative to the potential effects of the project or knowledge of Indigenous issues and must be free from bias or conflict of interest relative to the project.
Integrated Tailored Impact Statement Guidelines (Integrated Guidelines)	Document that provides direction and requirements for the proponent in preparing an Impact Statement.

Memorandum of Understanding on Integrated Impact Assessments Under the <i>Impact Assessment Act</i> Between the Impact Assessment Agency of Canada and the Canadian Nuclear Safety Commission (MOU)	The Memorandum of Understanding on Integrated Impact Assessments Under the <i>Impact Assessment Act</i> Between the Impact Assessment Agency of Canada and the Canadian Nuclear Safety Commission creates an administrative framework within which IAAC and the CNSC can cooperatively allow for the exercise of the powers and duties established by the <i>Impact Assessment Act</i> and the <i>Nuclear Safety and Control Act</i> , as necessary, and as reflected in those Acts. The Memorandum of Understanding confirms the commitment of IAAC and the CNSC to work collaboratively to ensure that integrated assessments are conducted in an efficient manner.
<i>Nuclear Safety and Control Act</i> (NSCA)	The Nuclear Safety and Control Act establishes the CNSC and sets out its mandate, responsibilities and powers.
Participant	Broadly defined to mean anyone appearing at or participating in an integrated assessment process, including public hearings.
Proponent	A person or entity – federal authority, government or body – that proposes the carrying out of, or carries out, a designated project.
Review Panel Secretariat	Staff members from IAAC and the CNSC who support the review panel in fulfilling its work and responsibilities and who operate within its deliberative privilege. In the case of a joint review panel, the secretariat may also include staff from another jurisdiction (e.g. province).

1. Introduction

On July 7, 2025, the Impact Assessment Agency of Canada (IAAC) determined that a comprehensive impact assessment (IA) is required for the Peace River Nuclear Power Project (the project) pursuant to section 16 of the *Impact Assessment Act* (IAA).

On the same day, IAAC, on behalf of the Minister of Environment and Climate Change (Minister) referred the impact assessment to a review panel. Pursuant to section 43 of the IAA, the Minister must refer to a review panel designated projects that include physical activities regulated under the *Nuclear Safety and Control Act* (NSCA). The review panel will conduct an integrated impact assessment (integrated assessment) that follows the framework outlined in the [Memorandum of Understanding on Integrated Impact Assessments Under the *Impact Assessment Act* between the Impact Assessment Agency of Canada and the Canadian Nuclear Safety Commission](#) (the MOU).

The Public Participation Plan (the Plan) for the assessment of the project was developed by IAAC and the CNSC to set out opportunities for participation during the integrated assessment process. The Plan describes the current approach to public participation and does not preclude IAAC, the CNSC or the review panel from making changes to the approaches described in this Plan to adjust and develop engagement activities that are inclusive and responsive to the public needs, and to encourage meaningful public participation during the integrated assessment. As this plan is now final and will not be changed, IAAC, the CNSC, and the review panel will communicate the latest available information on engagement and public participation through the tools described in Section 6.

For more information on public participation under the IAA, please see the [Framework: Public Participation Under the *Impact Assessment Act*](#) and [Guidance: Public Participation Under the *Impact Assessment Act*](#).

The Plan is intended to be inclusive of all people and may include Indigenous people, groups and organizations, where appropriate. A distinct and separate [Indigenous Engagement and Partnership Plan](#) for the assessment of the proposed project is also available, outlining opportunities and methods for meaningful consultation and engagement with potentially affected Indigenous Nations and communities.

2. Description of the proposed project

Energy Alberta (the proponent) is proposing the construction of up to four nuclear reactors, located approximately 30 kilometres north of the town of Peace River, Alberta. As proposed, the project would cover 1,424 hectares in area and operate for approximately 70 years. The generated energy would be sold to Alberta consumers and industry through the Alberta electrical grid.

As part of the integrated assessment process, the proponent will be submitting the balance of the required information to complete the application for a Licence to Prepare Site application under the NSCA. The proponent may pursue subsequent licences to construct, operate, decommission at later

stages, should the project be approved. The assessment is being conducted in collaboration with the CNSC.

For more information on the integrated assessment of the project or to view the information and comments received, visit the Peace River Nuclear Power Project page on the Canadian Impact Assessment Registry (the registry) at <https://iaac-aeic.gc.ca/050/evaluations/proj/89430>.

3. Objectives of Public Participation

The Plan outlines the various ways participants may provide input and engage in the process. The following are IAAC's and the CNSC's objectives for public participation throughout the integrated assessment process:

- Public¹ participation is meaningful. This means that the public is provided with:
 - inclusive and predictable opportunities to take part in the integrated assessment;
 - the information they need to participate, in a timely manner and in a format that is accessible; and
 - support funding from IAAC's [Participant Funding Program](#) to participate in an informed manner.
- The public is engaged early and often, especially in each key phase of the integrated assessment.
 - The public brings forward key issues early in the process to inform the proponent's Impact Statement.
 - The proponent is continually informed about the concerns raised by the public.
 - The public was and will be involved in the development of key documents. The public was involved in the revision of this Plan, and the [Integrated Tailored Impact Statement Guidelines](#) (Integrated Guidelines). The public will be involved in the review of the draft review panel's Terms of Reference, the proponent's Impact Statement Summary and the draft potential conditions.
 - In this case, with the integrated assessment conducted by a review panel, a key opportunity for public participation includes participation in the public hearings.
- The selection of participation opportunities at each key phase in the process is based on the needs, interests, and values of the public. Participation opportunities include, but are not limited to, comment periods, public hearings, and in-person or virtual information or consultation events.
- Public views heard throughout the process are tracked and inform decision-making.
- The objectives of this Plan inform the review panel's Terms of Reference.

¹ * In the context of an integrated assessment, "public" typically refers to the general population, or residents, without reference to geographical limits of any city, town, region or province.

4. Identification of participants

IAAC and the CNSC invite all individuals, groups and organizations with an interest in the integrated assessment of the project to participate in the process and related engagement activities.

Distribution List

IAAC and the review panel, once established, will maintain a distribution list for the integrated assessment of the project. Participants on the distribution list will receive updates and notices about the integrated assessment for the project as the process progresses. If your contact information changes, please reach out to us to update this information .

If individuals or organizations would like to be on the distribution list, they can send an email to peacenuclear-nucleairepaix@iaac-aeic.gc.ca with their full name and email address; or write a letter to IAAC at the address below with their name and mailing address. Individual's names and email/ mailing addresses will not be published.

Please consult the [Indigenous Engagement and Partnership Plan](#) for a list of the Indigenous Nations and communities that are identified for consultation and engagement as part of the integrated assessment of the project. This list may be updated throughout the consultation and engagement process as IAAC and the CNSC receive and gather more information on the potential impacts of the project and Indigenous and treaty rights that may be affected.

5. Public participation tools

IAAC and the CNSC plan to use the following communication and engagement methods, where appropriate, to ensure meaningful participation throughout the integrated assessment. The methods listed include feedback received from the public during engagement events conducted by IAAC and the CNSC in April, June, and September 2025.

Increase awareness

To convey information and updates on the process, announce public participation opportunities, objectives of comment periods, and funding opportunities:

- Public notice(s) and key documents in plain language published on the registry and in public viewing centres (see Appendix);

- Publication of key project updates through local media channels, including local newspapers, local press releases and social media channels, news websites, community radio announcements, and targeted mailouts;
- Leverage communications that can be carried out by municipalities via their distribution lists and social media platforms. Plain language and informative emails to the distribution list²;
- Smaller group and one-on-one engagement opportunities, including tailored sessions with community members, to reflect local preferences for personalized and accessible participation;
- Flexible and community-directed participation opportunities and formats, including oral storytelling, ceremonial contributions, and community-hosted dialogue circles, where appropriate;
- Integration of language and cultural protocols to allow for inclusive participation, where appropriate;
- Direct outreach to residents living in close proximity to the proposed sites, which may include targeted and mailed notices, door-to-door information drops where feasible, and signage posted at key local traffic intersections and community gathering points;
- In-person and virtual interactive community and information sessions;
- In-person pop-up information booths; and
- Social media updates that provide information on the integrated assessment and announce opportunities for public participation and funding. Social media accounts used by IAAC are listed below:

Facebook:

- @EnvironmentandNaturalResourcesinCanada
- @EnvironnementetressourcesnaturellesauCanada

LinkedIn:

Impact Assessment Agency of Canada

X:

- @IAAC_AEIC
- @AEIC_IAAC

Build understanding

- Training opportunities about the [integrated assessment process](#) (as requested);
- Information sessions and open houses to learn more about the project, the integrated assessment process and how to submit comments (held virtually and in-person);
- Meetings, focus groups, presentations, and workshops, where appropriate; and
- Sharing plain language summaries of key documents, fact sheets, infographics, and presentation materials in an accessible format.

² Consult section 4. "Identification of Stakeholders" for more information on the distribution list and how to register.

Participate and Review

To meaningfully engage and receive input from communities most likely to be affected by the project:

- Project specific e-mail address for contacting IAAC and the CNSC: peacenuclear-nucleairepaix@iaac-aeic.gc.ca;
- Public comment periods at key stages of the process;
- Posting of written comments and all other materials relevant to the assessment on the registry during public comment periods and throughout the process;
- Sharing summaries of what we heard following public comment periods; and
- Public hearings held by the review panel. This can include submitting written comments or coming in person to hearings to share information that could help with the assessment.

Note that this list is not exhaustive and may be adjusted during the course of the integrated assessment, based on input received from the public, to facilitate participation.

6. Activities and public participation approach

The following table provides a description of the main phases in the integrated assessment, and an outline of engagement opportunities in each phase, including events led by IAAC, the CNSC, and the review panel. The table describes the objectives of each phase, the anticipated engagement activities that will be used, and the engagement methods that will support the activities.

The objectives of the Plan will be considered in the development of the review panel's Terms of Reference. The review panel will select engagement activities that align with any rules or procedures it develops or adopts.

Table 1: Table of public participation approaches and activities

Phase 1: Planning - The Planning phase is a maximum of 180 calendar days, excluding any time limit suspension.

This Phase commenced on April 14, 2025, with the acceptance of the Initial Project Description (IPD), and ended on April 20, 2026.

Objectives of the Phase	Activities	Public Participation Tools
<ul style="list-style-type: none"> • Support understanding of the project and its potential impacts. The integrated assessment process allows for early identification of issues and concerns. • Provide an opportunity for participants to apply for funding to support their participation in the Planning phase of the integrated assessment. • Raise public awareness of the integrated assessment, including opportunities for meaningful participation. • Gather public input and views on the draft Integrated Guidelines and the draft Public Participation Plan, prior to finalizing these documents. 	<ul style="list-style-type: none"> • From April 14 to May 14, 2025, IAAC and the CNSC invited comments on the Summary of the Initial Project Description. Comments received were used to prepare the Summary of Issues, which was provided to the proponent on May 23, 2025. • Virtual information sessions were held on April 23 and 24, and June 12, 16, and 19, 2025. • From June 23 to July 23, 2025, IAAC and the CNSC invited comments on the draft Integrated Guidelines and the draft Public Participation Plan. • In person information sessions, open houses, and meetings were held in communities between June 23 to 27 and September 23 to 25, 2025, to: <ul style="list-style-type: none"> ○ Inform participants about the project and the integrated assessment process; ○ Provide the opportunity to comment on the draft Integrated Guidelines and draft Public Participation Plan; ○ Attend and present at town halls hosted by local municipalities; 	<ul style="list-style-type: none"> • Notices on the registry, newspaper and radio, and social media updates. • Online comment periods (via the registry). • Meetings, information sessions, open house and/or workshops/ focus groups/ pop-up information booths (virtual or in- person). The presentation slides used during information sessions and plain language summary of the draft Integrated Guidelines used for public engagement purposes were made available on the registry. • Community sessions, virtual or in-person, held in the communities most likely to be affected by the project. • Copies of key documents were placed in the viewing centers indicated in Appendix 1. • IAAC and the CNSC continue to respond to any inquiries via the registry, by mail, or by phone.

	<ul style="list-style-type: none">○ Attend and provide information on the integrated assessment at information sessions hosted by the proponent; and○ Host Nuclear 101, CNSC 101 and IA 101 information sessions and pop-up information booths, and workshops on the draft Integrated Guidelines in the region.• IAAC and the CNSC accepted comments throughout the Planning Phase, including those received after comment period deadlines. Comments received became part of the project record and informed the development of the Integrated Guidelines and other plans.• This phase ended with the posting of the Notice of Commencement of the Impact Assessment and related documents.• IAAC continues to administer participant funding to support participation in the integrated assessment process.	
--	---	--

Phase 2: Impact Statement - The Impact Statement Phase is a maximum of 3 years (excluding any time limit extension).

This phase commenced upon posting the Notice of Commencement of the Integrated Assessment and related documents on April 20, 2026.

Objectives of the Phase	Expected Activities and Timelines	Public Participation Tools
<ul style="list-style-type: none">• Increase public awareness and understanding of the integrated assessment process and how to meaningfully participate.• Encourage the public to provide information to the proponent to inform the development of the Impact Statement.• Notify participants of key steps in the process such as the receipt of the Impact Statement, the appointment of the review panel, and the opportunity to comment on the Summary of the Impact Statement.• Seek public and community knowledge related to environmental, social, health and economic impacts of the project.• Obtain feedback on the potential effects of the project and proposed mitigation measures to help the review panel understand views about the project and inform its assessment (during the Impact Assessment Phase).• Review the proponent's Summary of the Impact Statement information and address	<ul style="list-style-type: none">• IAAC and the CNSC will invite comments on the draft Terms of Reference for the review panel.• IAAC and the CNSC will review the Impact Statement to determine whether all information and studies requested in the Integrated Guidelines have been provided. IAAC and the CNSC may request additional information from the proponent if the Impact Statement does not conform to the Integrated Guidelines.• IAAC and the CNSC will invite comments on the Summary of the Impact Statement. The Impact Statement and the Summary of the Impact Statement will be posted to the registry, and a notification email will be sent to the distribution list.• IAAC and the CNSC will engage with the public to prepare for the Impact Assessment phase.• If applicable, IAAC and the CNSC will invite comments on any agreement with other jurisdictions pertaining to the establishment	<ul style="list-style-type: none">• Public notices announcing participation opportunities on the registry, emails to the distribution list and updates on social media.• Emails to the distribution list informing participants of key steps in the process.• Posting of documents relevant to the integrated assessment and comments received on the registry.• Comment period (via the registry) on the proponent's Impact Statement Summary.• Comment period on the draft Terms of Reference for the review panel.• Information sessions (virtual or in-person) or open houses in the communities of those most likely to be affected by the project. In carrying out these activities, IAAC and the CNSC will consider, where feasible, the existing seasonal commitments of community members.

<p>any outstanding issues or deficiencies raised by the public.</p> <ul style="list-style-type: none">• Seek public, Indigenous Nation and community, and local community input on the draft Terms of Reference for the review panel.	<p>of a review panel or the coordination of assessment procedures.</p> <ul style="list-style-type: none">• IAAC and the CNSC will hold information sessions to explain the process and to provide an opportunity to comment on the Impact Statement.• The review panel members may be appointed and may attend cultural training with Indigenous Nations and communities and orientation activities.• This phase is complete when IAAC and the CNSC are satisfied that the proponent has submitted all the information and studies required in the Integrated Guidelines.	
---	---	--

Phase 3: Impact Assessment - The time limit for the Impact Assessment Phase is up to 300 days.

The Impact Assessment phase is led by the review panel and occurs, immediately after IAAC issues the notice under s.19(4) of the IAA indicating that it is satisfied that the proponent has submitted all necessary information and studies.

IAAC will establish the time limits for this phase including the time limit for the submission of the review panel report and for the posting of IAAC's recommendations on potential conditions on the registry.

Objectives of the Phase	Expected Activities & Timelines	Public Participation Tools
<ul style="list-style-type: none">• Increase public awareness and understanding of the integrated assessment process, including opportunities for meaningful public participation, and encourage participants to participate in the public hearings.• Obtain views of participants on the information contained in the Impact Statement and the draft public hearing procedures to ensure the review panel sets up meaningful and accessible hearings for all participants.• In advance of the hearings, seek the following to inform the review panel's rationale, conclusion and recommendations:<ul style="list-style-type: none">◦ Views or information on any topic that has been covered in the Impact Statement or is part of the scope of the assessment.• Obtain information via the hearings.	<ul style="list-style-type: none">• Establishment of the review panel and its mandate in the Terms of Reference.• The review panel may organize information sessions to explain activities and timelines related to the review panel process.• Public comment period(s), and information sessions held and determined by the review panel, in accordance with its Terms of Reference.• The review panel may ask for additional information of the proponent or participants before it determines that the information on the record is sufficient to proceed to a public hearing.• The review panel may hold a comment period on the draft public hearing procedures.• The review panel will be mandated to hold meaningful and accessible public hearing sessions in the communities most likely to	<ul style="list-style-type: none">• Potential public comment period(s), and information sessions held and determined by the review panel.• Public hearing sessions to discuss the project's potential effects, mitigation measures, and follow-up program.• Written or oral submissions by participants during the public hearings.• Public notices announcing participation opportunities, emails to the distribution list, and updates on social media.• Once the review panel record is closed, IAAC and the CNSC will continue to receive and post comments on the registry, but these will not be considered by the review panel and will not be part of the project record.

	<p>be affected by the project. Participation timelines, dates, locations and duration for the public hearings will be determined by the review panel and will be announced in a Notice of Public Hearing. In setting these details, the review panel will consider seasonal periods when community members may have limited availability, to support meaningful and inclusive participation.</p> <ul style="list-style-type: none">• Following the close of the review panel record, the review panel will prepare its report. The report will contain the review panel's rationale, conclusion, and recommendations.• IAAC will post a notice and email the distribution list to notify participants when the review panel's report has been submitted to the Minister and is posted on the registry.• IAAC will continue to administer funding to support participation in the integrated assessment.	
--	---	--

Phase 4: Decision Making - The Decision-Making phase is a maximum of 90 days, which starts following the posting of IAACs recommendations on potential additional conditions and ends with Governor in Council's decision.

Objectives of the Phase	Expected Activities and Timelines	Public Participation Tools
<ul style="list-style-type: none">• Inform the proponent and the public about the Governor-in-Council's decision on the project.• Inform the public on the project conditions under the IAA as described in the Minister's³ decision statement.	<ul style="list-style-type: none">• No engagement activities during this phase.• IAAC will post the Decision Statement on the registry, including the reasons for the public interest determination and, if the project is allowed to proceed, the conditions with which the proponent must comply.• Where applicable, the Government of Canada issues a response to the review panel's recommendations that relate to federal mandates and interest.	<ul style="list-style-type: none">• Decision Statement will be posted on the registry.• Public notices, email sent to the distribution list, and updates on social media to notify of the issuance of the Decision Statement.

³ [Minister of the Environment, and Climate Change and Nature.](#)

Phase 5: Post Decision - The Decision Statement will expire if the proponent does not substantially begin to carry out the project within a certain period. This period is established by the Minister in Phase 4, considering views provided by the proponent.

If project receives a positive IA decision⁴

Objectives of the Phase	Expected Activities and Timelines	Public Participation Tools
<ul style="list-style-type: none">• Inform the public on the review panel's licensing decision, including the project's conditions under the NSCA.• The public can comment at any time if they have concerns about a proponent not complying with the conditions of the project as set out by IAAC or the CNSC.• Inform the public of follow-up and monitoring activities and results from any potential follow-up program(s).• Inform participants of potential amendments to the Decision Statement.• Inform participants on potential licensing amendments.• Inform participants on any potential opportunities for participants to take part in follow-up and monitoring activities, where relevant and applicable.	<ul style="list-style-type: none">• The review panel makes the licensing decision, and if a licence is granted, issues the Licence to Prepare Site.• IAAC and/or the CNSC post required follow-up and monitoring documents on the registry and/or the CNSC's website, according to the schedule identified in the Decision Statement.• The duration of a potential public comment period on potential amendments to the Decision Statement will be determined by IAAC and will be announced during the post-decision phase, on an as-needed basis.• IAAC transfers the lead role for public engagement and the regulatory oversight of the project to the CNSC.• Post-decision communication activities related to nuclear licensing and regulatory oversight will be led by the CNSC. These	<ul style="list-style-type: none">• Public notices, website postings, emails sent to the distribution list and updates on social media.• Comment period (via the registry) on potential amendments to the Decision Statement.

⁴ The Decision Statement may also state a non-positive IA decision, including reasons for the determination. In this case, the review panel is still required to make a licensing decision on the project, and the public will be notified of this decision via the public participation tools outlined in the above table.

<ul style="list-style-type: none">• Transfer the lead role for public engagement throughout the lifecycle of the project from IAAC to the CNSC.	<p>include communications on participant funding, Commission proceedings and decisions, and compliance.</p> <ul style="list-style-type: none">• CNSC administers participant funding to support public participation in future licensing processes throughout the lifecycle of the project.• CNSC is responsible for conducting compliance verification activities to confirm the licensee is meeting the conditions set out in their licence.	
---	---	--

7. Participant funding

Funding to support public participation is available. For information about who is eligible for funding or to apply for funding, visit [IAAC's Participant Funding Program](#).

For more information, contact IAAC's Funding Program by telephone at 1-866-582-1884 or by email at fp-paf@iaac-aeic.gc.ca.

Should the project be allowed to proceed after the integrated assessment process is complete, funding will be available in the post-decision phase through [CNSC's Participant Funding Program](#) to support public participation in future licensing processes throughout the lifecycle of the project.

8. Submitting comments

For the review panel to consider comments, they must be part of the project record and posted to IAAC's registry. Therefore, during the assessment, IAAC and the CNSC will rely primarily on the registry as the public record for comments. IAAC and the CNSC will work to streamline the collection and public dissemination of information while ensuring their respective legislative requirements are satisfied.

Comments may be submitted at any time during the integrated assessment by using the "Submit a comment" feature on the proposed project's page on the registry (reference number 89430, at [Peace River Nuclear Power Project](#)). Attachments can also be uploaded using this feature.

If you have any difficulties with the submission process, please contact IAAC and, when the review panel is appointed, the review panel's secretariat, using the contact information below. Comments may also be submitted by email or by regular mail. Note that the "Submit a comment" feature may be disabled from the time the review panel closes the record and prepares its report until the submission of the report to the Minister. Should IAAC conduct a comment period after the release of the report, the function would be reactivated, and a notice will be sent out to the distribution list.

Comments and other documents received by IAAC or the review panel will be part of the public project file and will be posted on the registry. IAAC's [Submission Policy](#) determines what information can be shared publicly and what information should remain private. For more information on how we protect your privacy, please refer to IAAC's [Privacy Notice](#). If you do not want your comment to be posted on the registry, please contact IAAC before submitting your comment.

9. Contact information

The IAAC office designated for administering the integrated assessment of the project in collaboration with the CNSC is:

Integrated Assessment for the Peace River Nuclear Power Project
Impact Assessment Agency of Canada
Review Panel Division
160 Elgin Street, 22nd Floor
Ottawa, Ontario K1A 0H3
Email: peacenuclear-nucleairepaix@iaac-aeic.gc.ca
