Wharf Upgrades and Launching Ramp Reconstruction at the Covehead Small Craft Harbour, Prince Edward Island – Public Comments Invited

June 6, 2025 – Transport Canada must determine whether the proposed Wharf Upgrades and Launching Ramp Reconstruction at the Covehead Small Craft Harbour, Prince Edward Island is likely to cause significant adverse environmental effects. Transport Canada was only made aware of its regulatory requirements after a determination under section 82 of the *Impact Assessment Act* (IAA) was made by DFO and Parks Canada (CIAR # [88624](#)) on November 29, 2024.

To help inform this determination, Transport Canada is inviting comments from the public respecting that determination. All comments received will be considered public and may be posted online. For more information, individuals should consult the [Privacy Notice](#).

Written comments must be submitted **by July 6, 2025** to:

The Proposed Project

Post-tropical storm Fiona damaged the wharf infrastructure at the Covehead Fisheries and Oceans Canada - Small Craft Harbour. The proposed project will include the reconstruction of existing wharf and launching ramp structures. Wharf structure #603 will be removed and reconstructed with steel sheet pile and armour stone shore protection; wharf structure #403 will be removed and replaced with steel sheet pile; and wharf structure #405 will be removed and reconstructed with a new cope wall. All components of the work will raise the elevation of the deck by approximately 1 metre. Launching ramp structure #501 will be reconstructed with a new slab-on-grade ramp.
