

Fort a la Corne - Star Diamond Project

Fire Plan 2011

FALC Site - Fire Plan

Location

The Shore Gold - Fort a la Corne -Star Diamond Project (Shore Gold Exploration Site)is located approximately 100 Kms east of Prince Albert, SK and approximate 27 Kms south of Highway 55 from Shipman. The Fort a la Corne Star Diamond Project is located within the confines of the Fort a la Corne Forest. Access to the Shore Gold Exploration Site is via grid road directly south of the village of Shipman to the northern entrance of the Fort a la Corne Forest. The Site can also be accessed from the East from Highway #6 at a point approximately 27 Kms West along the Division Road or from the west approximately 30 Kms via Garden River Road . An Access Map will be attached as Appendix "A" to this Fire Plan for Reference.

Operations and Personnel

As of March 2009 the Shore Gold Exploration Project (Site) has moved to a care and maintenance mode which has required the downsizing of operational personnel to a staff of four. The four remaining staff works a week on site and a week off site. Two people will be manning the site for a week and are available on site during the hours of 0600Hrs to 2400Hrs. When not on Site there will be a person on call during the quiet hours. Operations will consist of general care and maintenance of all existing sites, Enviromental monitoring including reclamation/remediation projects. Contact Information for Shore Gold On Site Personnel will be attached as Appendix "B" to this Fire Plan.

Fire Plan

- 1) When a fire has been identified in the Shore Gold Exploration Site area and initial efforts to extinguish same have proven futile, information about the Fire and its location will be communicated to all on site personnel by the quickest and most efficient means available (radio or phone). All personnel on Site will proceed to the nearest muster station, if practical, if this is not safe to do so then to a location that is safe and out of harm's way.

- 2) Once the fire's location and type has been assessed the onsite Shore Gold Primary Contact ,as identified on the Emergency Contact List, will contact the appropriate Fire Response Center and relay all pertinent information as required.

Structural Fires on Site:

Contact the **Smeaton Fire Dept.** via the **911** Call format.

Forest Fires on Site:

Contact the **Forest Fire Centre, Prince Albert – 1-800-667-9660**

- 3) The Shore Gold Primary contact will then advise the Project Manager or designate of the situation. The Shore Gold Primary Contact on site will take control of the situation, activate all resources available, and determine if a Site Evacuation is required.

Site Evacuation Plan

- 1) In the event that there is a Fire Threat to the Shore Gold Exploration Site the Forest Fire Center, Prince Albert will notify The Primary Site Contact, as indicated in Appendix "B" , the "Emergency Contact List,". The Fire Control Center will advise that there is a Forest Fire threat to the Shore Gold Exploration site and will advise of the fire's location, speed, and direction of travel. The Forest Fire Control may recommend that the affected area be evacuated.
- 2) In the case of a general evacuation the Primary Site Contact will advise all on site Personnel and or contractors that the Site is to be evacuated. All persons will be advised of the safest evacuation route to be followed.
A Map of Evacuation routes from the Shore Gold Exploration site is attached as APPENDIX "A."
- 3) If there is a Forest Fire threatening the Shore Gold Exploration area the Evacuation Routes will be via Division Road East to Hwy# 6 or Division Road West to the Shipman Trail and North to Hwy # 55. Should evacuation from the Shore Gold Camp be required there are two evacuation routes that can be taken . Either via Division Road East to Hwy # 6 or via the Sewer Road to Shore Rd and west to Division Road West. The Evacuation routes will be dependent on Fire Location and its direction of Travel. The Safest route of evacuation will be followed.
