

TABLE OF CONTENTS

1.0 OVERVIEW.....	1-1
1.1 PURPOSE	1-1
1.2 STRUCTURE OF SUBMISSION.....	1-1
1.3 APPROACH TO JOINT REVIEW PANEL INFORMATION REQUESTS.....	1-4
1.3.1 Background.....	1-4
1.4 CHANGES TO THE PIERRE RIVER MINE PROJECT	1-5
1.4.1 Lease 14	1-5
1.4.2 Development Timing.....	1-5
1.4.3 Asphaltene Energy Recovery (AER).....	1-6
1.5 RESPONSE TO THE JACKPINE MINE EXPANSION DECISION REPORT	1-6
1.5.1 Tier 4 Truck Availability	1-6
1.5.2 Lower Athabasca Regional Plan.....	1-7
1.5.3 Climate Change Modelling.....	1-7
1.5.4 Terrestrial Impact Assessment	1-7
1.5.5 Mitigation for Terrestrial Effects and Conservation Offsets	1-8
1.5.6 Aboriginal Concerns.....	1-9
1.6 ASSESSMENT CASES.....	1-9
1.6.1 Approach to the Pierre River Mine Effects (JRP SIR 5)	1-9
1.6.2 Approach to the Pre-Industrial and Updated Planned Development Cases (JRP SIR 8).....	1-10
1.6.3 Approach to the Cultural Review (JRP SIR 69a)	1-11
2.0 ERRORS AND OMISSION	2-1
3.0 SUPPLEMENTAL INFORMATION REQUESTS.....	3-1
NEEDS, ALTERNATIVES, ALTERNATIVES TO.....	3-1
SIR 1	3-1
SIR 2	3-3
SIR 3	3-4
SIR 4	3-5
METHODS	3-13
DETERMINATION OF PIERRE RIVER MINE PROJECT EFFECTS	3-13
SIR 5	3-13
SIGNIFICANCE OF EFFECTS	3-21
SIR 6	3-21
SIR 7	3-28
CUMULATIVE EFFECTS.....	3-47

LIST OF TABLES

Table 1-1	North American Crude Oil Supply and Demand.....	3-2
Table 1-2	Projected Primary Energy Demand – 2000 to 2030	3-2
Table 4-1	Ore Preparation: Includes Oil Sand Excavation, Primary Sizing and Transport to the Ore Processing Surge (Storage) Pile or Bin	3-9
Table 4-2	Ore Conditioning: Includes Slurry Preparation and Secondary Sizing for Delivery to Bitumen Recovery	3-10
Table 4-3	Bitumen Extraction: Includes Primary Recovery and Secondary Flotation Recovery	3-11
Table 4-4	Froth Treatment: Includes Removal of Water (Containing Dissolved Salts), Mineral Solids and Where Applicable, Rejection of Asphaltene	3-12
Table 7-1	Residual Impact Classification for the Pierre River Mine Effects on Terrestrial Vegetation, Wetlands and Forest Resources in the Local Study Area: 2013 PRM Application Case - During Construction and Operations	3-29
Table 7-2	Residual Impact Classification for the Pierre River Mine on Wildlife Abundance: 2013 PRM Application Case - During Construction and Operations	3-30

Table 7-3	Residual Impact Classification for the Pierre River Mine on Wildlife Habitat: 2013 PRM Application Case - During Construction and Operations	3-33
Table 7-4	Residual Impact Classification of the Pierre River Mine on Wildlife Movement: 2013 PRM Application Case - During Construction and Operations	3-36
Table 7-5	Residual Impact Classification for Terrestrial Vegetation, Wetlands and Forest Resources in the Regional Study Area: 2013 Base Case to 2013 Planned Development Case - During Construction and Operations	3-37
Table 7-6	Residual Impact Classification for the Effects on Terrestrial Vegetation, Wetlands and Forest Resources in the Regional Study Area: Pre-Industrial Case to 2013 PRM Application Case - During Construction and Operations	3-38
Table 7-7	Residual Impact Classification for Terrestrial Vegetation, Wetlands and Forest Resources in the Regional Study Area: Pre-Industrial Case to the 2013 Planned Development Case - During Construction and Operations	3-39
Table 7-8	Residual Impact Classification for Effects on Wildlife in the Regional Study Area: 2013 Base Case to 2013 Planned Development Case - During Construction and Operations	3-40
Table 7-9	Residual Impact Classification for Effects on all Key Indicator Resources in the Regional Study Area: Pre-Industrial Case to 2013 Base Case, 2013 PRM Application Case and 2013 Planned Development Case - During Construction and Operations	3-42
Table 8-1	Summary of Key Indicator Resource Significance Determinations for Cumulative Effects to Terrestrial Resources From the Pre-Industrial Case to the 2013 PRM Application Case	3-59
Table 8-2	Effects Classification and Significance for Traditional Land Use Under the 2013 PRM Application Case	3-61
Table 8-3	Summary of Key Indicator Resource Significance Determinations for Cumulative Effects to Terrestrial Resources From the Pre-Industrial Case to the 2013 Planned Development Case	3-64
Table 8-4	Effects Classification and Significance for Traditional Land Use Under the 2013 Planned Development Case	3-65
Table 12-1	Annual Bitumen Recovery	3-71
Table 16-1	Directive 074 Compliance Estimation for the Pierre River Mine	3-78
Table 19-1	Summary of Regional SO ₂ and NO ₂ Predictions	3-85
Table 23-1	Summary of Water Level Measurements – March 2009	3-94
Table 23-2	Summary of Quaternary Deposit Hydraulic Conductivity from Single Well Response Tests and One Pumping Test – Pierre River Mine ETDA Area	3-94
Table 23-3	Vertical Hydraulic Gradients – March 2009 – Pierre River Mine ETDA Area	3-95
Table 23-4	Groundwater Quality Results - Field Measured Parameters	3-95
Table 23-5	Groundwater Quality Results - General and Inorganic Parameters	3-96
Table 23-6	Groundwater Quality Results - Dissolved Metals	3-97
Table 23-7	Groundwater Quality Results - Dissolved Hydrocarbons and Naphthenic Acid	3-99
Table 23-8	Groundwater Quality Results - Polycyclic Aromatic Hydrocarbons	3-100
Table 23-9	Groundwater Quality Results - Alkylated Polycyclic Aromatic Hydrocarbons	3-102
Table 28-1	Athabasca River Flow Depths at Node S24 (located within Reach 4) for the Pre-Industrial Case and 2013 Base Case	3-114
Table 28-2	Changes to the Athabasca River Flow Depths at Node S24 for the 2013 PRM Application Case	3-115

Table 28-3	Changes to the Athabasca River Flow Depths in Reach 4 for the 2013 Planned Development Case	3-116
Table 28-4	Change to Athabasca River Water Level in Reach 4 Considering Climate Change Effects in 2050s.....	3-116
Table 29-1	Changes to the South Redclay Lake Outflow Channel Water Levels	3-119
Table 34-1	Breeding Habitat Requisites for the Waterfowl Species Observed within the Local Study Area During the Waterfowl Aerial Surveys, 2005 and 2006 ^(a)	3-133
Table 41-1	Wood Bison Habitat Change Within “Known” Core Range from the Pre-Industrial Case and the 2013 Base Case in the Regional Study Area	3-152
Table 41-2	Wood Bison Habitat Change Within “Observed” Core Range from the Pre-Industrial Case and the 2013 Base Case in the Regional Study Area	3-154
Table 42-1	Federally Listed Species At Risk that Could Occur in the Local Study Area...	3-157
Table 42-2	Change in High Suitability Habitat for Wildlife Species at Risk Due to the South Redclay Lake.....	3-158
Table 43-1	Potential and Observed Federally Listed Species in the Local Study Area	3-161
Table 43-2	Mitigation and their Mechanisms for Minimizing the Effects of the Project on Federally Listed Species at Risk.....	3-162
Table 43-3	Monitoring and Adaptive Measures	3-164
Table 46-1	Peatlands and Patterned Fens to be Cleared and Reclaimed in the Local Study Area	3-171
Table 47-1	Ecosite Phases and Wetlands Types to be Cleared and Reclaimed in the Local Study Area.....	3-175
Table 49-1	Old Growth Forest in the Regional Study Area: 2013 Base Case to 2013 Planned Development Case	3-180
Table 66-1	Traditional Plant Potential in the Local Study Area	3-218
Table 66-2	Traditional Plant Potential in the Regional Study Area.....	3-223
Table 67-1	Traditional Use Plant Species Occurrences in the Pierre River Mine Local Study Area	3-230
Table 68-1	Effects Classification Summary and Significance for Traditional Land Use Under the 2013 PRM Application Case.....	3-239
Table 72-1	Local Study Area Disturbances to Potentially Affected Registered Fur Management Areas.....	3-265
Table 72-2	Regional Study Area Disturbances to Potentially Affected Registered Fur Management Areas.....	3-266
Table 72-3	Traditional Plant Potential for Local Study Area Portion of Registered Fur Management Area #2016	3-267
Table 73-1	Accidents and Malfunction Scenarios for PRM October 2013 Submission.....	3-269
Table 73-2	Probability and Consequences of Potential Accidents and Malfunctions.....	3-272
Table 73-3	Receptors Considered in Assessing Accidents and Malfunctions for Pierre River Mine.....	3-275
Table 73-4	Linkages and Magnitude of Effect for Non-Wildlife Receptors	3-276
Table 73-5	Linkages and Magnitude of Effect for Wildlife Receptors.....	3-277

LIST OF FIGURES

Figure 23-1	Location of Monitoring Wells in the Area of the Pierre River Mine External Tailings Disposal Area	3-93
Figure 58-1	Anticipated Schedule for all Design and Construction Activities for Pierre River Mine.....	3-193

Figure 66-1	Traditional Plant Potential in the Terrestrial Local Study Area – 2013 Base Case.....	3-219
Figure 66-2	Traditional Plant Potential in the Terrestrial Local Study Area – 2013 PRM Application Case.....	3-220
Figure 66-3	Traditional Plant Potential in the Terrestrial Local Study Area – 2013 Planned Development Case	3-221
Figure 66-4	Traditional Plant Potential in the Terrestrial Local Study Area – 2013 Closure.....	3-222
Figure 66-5	Traditional Plant Potential in the Terrestrial Regional Study Area – Pre-Industrial Case	3-224
Figure 66-6	Traditional Plant Potential in the Terrestrial Regional Study Area – 2013 Base Case	3-225
Figure 66-7	Traditional Plant Potential in the Terrestrial Regional Study Area – 2013 PRM Application Case.....	3-226
Figure 66-8	Traditional Plant Potential in the Terrestrial Regional Study Area – 2013 Planned Development Case	3-227
Figure 67-1	Traditional Use Trees Observed on Vegetation Plots in the Terrestrial Local Study Area.....	3-233
Figure 67-2	Traditional Use Shrubs Observed on Vegetation Plots in the Terrestrial Local Study Area.....	3-234
Figure 67-3	Traditional Use Forbs Observed on Vegetation Plots in the Terrestrial Local Study Area.....	3-235
Figure 67-4	Traditional Use Graminoids Observed on Vegetation Plots in the Terrestrial Local Study Area	3-236
Figure 67-5	Traditional Use Lichen Observed on Vegetation Plots in the Terrestrial Local Study Area.....	3-237
Figure 75-1	Jackpine Mine Avian Mortalities (2009 to 2012).....	3-302
Figure 75-2	Muskeg River Mine Avian Mortalities (2003 to 2012).....	3-303
Figure 75-3	Seven-Step Cycle of the Adaptive Management Process.....	3-304

LIST OF APPENDICES

*Note: Appendices in **bold** are provided on CD only*

** Appendices located in Volume 1*

*** Appendices located in Volume 2*

- Appendix 1* SIR 5 – Determination of Pierre River Mine Project Effects
- Appendix 2** SIR 8 – Cumulative Effects
- Part 1 – Pre-Industrial Case
- Part 2 – Planned Development Case
- Part 3 – 2013 PRM Application Case to Pre-Industrial Case Assessment
- Part 4 – 2013 Planned Development Case to Pre-Industrial Case Assessment
- Appendix 3 Supporting Information to SIR 5 and SIR 8**
- Appendix 3.1 Assessment Methods**
- Appendix 3.2 Air Emissions and Modelling Predictions**
- Appendix 3.3 Human Health Risk Assessment for the Shell Pierre River Mine Update**
- Appendix 3.4 Peace-Athabasca Delta Assessment**
- Appendix 3.5 Aerial Deposition Assessment**
- Appendix 3.6 Chronic Effects Benchmarks**
- Appendix 3.7 Wildlife Modelling**
- Appendix 3.8 Traditional Land Use Environmental Setting Report Update**
- Appendix 4 Climate Change**
- Appendix 5 SIR 35 and SIR 40 – Wildlife Habitat Maps**
- Appendix 6 Federally Listed Species at Risk Survey**
- Appendix 7** JRP SIR 69a Cultural Effects Review
- Appendix 8** JRP SIR 69b Supplemental Information for the Pierre River Mine Project -
 Assessment of Socio-Economic Effects on Aboriginal Groups
